

PURCHASING OF LIGHT VEHICLES POLICY

Adopted Date: 9 September 2009
Policy Number: GRC 0026
Policy Type: Strategic
Responsible Officer: Director Engineering
Department: Engineering Services

11	OM-072/23	24 May 2023	Review May 2024

1. BACKGROUND

Council has a large and varied light vehicle fleet. It is important that the procurement processes associated with this activity are streamlined, provide an optimum fleet type and adequately recognise local preference.

2. POLICY STATEMENT

- Vehicles will be replaced generally in accordance with the Light Fleet Specification Summary, notwithstanding some vehicles may require particular options and attachments to suit the task being carried out.
- Vehicles will be replaced in accordance with Council's Procurement Policy – GRC004.
- Vehicles are to be purchased locally if possible. If quotes are also called from outside the region Council will provide a local preference to the amount of \$750 or 5% of the net change-over cost of any individual vehicle, whichever is the lesser.
- Quotations or tenders will be called in accordance with Council's Procurement Policy. Quotations or tenders will be assessed by staff and processed on the proviso that the vehicle is being changed over in accordance with the approved Light Fleet Specification Summary.
- The purchase of any additional vehicle or one that varies from the approved Light Fleet Specification Summary shall be considered by full Council.
- Generally, Council replaces light vehicles based on the age or kilometres of the vehicle. In the instance where a vehicle has reached its age for renewal but has comparatively low kilometres and does not require repairs or maintenance beyond what is considered normal fair wear and tear and servicing costs and operates in a less critical or vehicle dependant role, the Plant Committee may consider deferring the vehicle due for replacement to a future budget, on a case by case basis.

3. POLICY PURPOSE

The purpose of this policy is to ensure the makeup of Council's light vehicle fleet is appropriate and that the procurement processes are efficient and transparent.

4. POLICY OBJECTIVES

The objectives of this policy are to:-

- Provide a more open, streamlined and consistent procurement process for light vehicles.
- Allow Council to focus on strategic issues and delegate operational matters with confidence.
- Provide clear direction for staff in assessing quotations or tenders.

5. SCOPE

This policy only applies to the light vehicle fleet detailed in Attachment A: Light Fleet Specification Summary.

The value of the local preference shall provide clarification to the Procurement Policy for this function only.

6. REVIEW DATE

May 2024

7. ATTACHMENTS

Attachment A: Light Fleet Specification Summary
